

## Appendix 4.2 - ePath Service Level Principles

[OH-CCO\\_Pathology@ontariohealth.ca](mailto:OH-CCO_Pathology@ontariohealth.ca)

ePath Support is available for all facilities transmitting cancer pathology reports to CCO.

ePath Support includes:

|                                                           |                                                                                      |
|-----------------------------------------------------------|--------------------------------------------------------------------------------------|
| Technical issue resolution                                | Change request                                                                       |
| HL7 transmission testing                                  | Clinical content review                                                              |
| General inquiries regarding pathology reporting standards | Informing CCO of eCC update implementations or Laboratory Information System updates |

In addition, ePath Support is available for issues, questions or concerns related to:

|                                                                               |                                |
|-------------------------------------------------------------------------------|--------------------------------|
| CAP electronic Cancer Checklist (eCC) and Biomarker content                   | Utilization of CAP eCCs        |
| iPort™ account creation/modification/cancellation and narrowcast subscription | Synoptic or completeness rates |
| Turnaround Time indicator                                                     | Surgical Indicators            |
